

**Proceedings of the 7-th Autumn Workshop
on Number theory**

**“Differential operators on modular forms
and application”**

Table of Contents

| | |
|---|-----------|
| 1. Holomorphic differential operators on Siegel modular forms and related topics | 1 |
| By Tomoyoshi Ibukiyama (Osaka Univ.) | |
| 2. Holomorphic differential operators with iteration | 24 |
| By Siegfried Böcherer | |
| 3. Holomorphic components of nonholomorphic differential operators (after restriction) | 39 |
| By Siegfried Böcherer | |
| 4. Nearly holomorphic modular forms and differential opera- tors | 50 |
| By Atsuo Yamauchi (Nagoya Univ.) | |

| | |
|---|-----|
| 5. Pullback formula and differential operators | 58 |
| By Noritomo Kojima(Tokyo Inst. Tech.) | |
| 6. Lie algebra actions on modular forms | 70 |
| By Rainer Schulze-Pillot (Univ. Saarlandes) | |
| 7. Holomorphic D-modules | 79 |
| By Hiroyuki Ochiai(Nagoya Univ.) | |
| 8. Special values of the standard zeta functions of Siegel modular forms | 109 |
| By Hidenori Katsurada (Muroan Inst. Tech.) | |
| 9. Periods of lifting | 139 |
| By Tamotsu Ikeda (Kyoto Univ.) | |
| 10. Pullbacks of Saito-Kurokawa lifts | 155 |
| By Atsushi Ichino (Osaka City Univ.) | |
| 11. On p-adic absolute CM-periods | 161 |
| By Tomokazu Kashio and Hiroyuki Yoshida (Kyoto Univ.) | |
